

Sociology Research Project

Assignment #5: Collect Data, due **Thursday, November 16th** by the end of class (5 points)

GOOGLE CLASSROOM

- Execute the plan of the methodology in step 4/assignment #4
- Your method of data collection needs to be **FORMALLY** approved by me before you can use them to begin collecting actual data.
- From the time I give you approval until the end of class Thursday, November 16th, you will have time to collect and organize data or to work on other parts of your research project.
 - If you are doing something online you can spend this day analyzing data or asking questions about the project with your peers.
- **In order to receive credit for this assignment**, I need to see your data collection method and some actual data – handed in by the end of class
 - **Hand/in-person:** physical paper copy or recorded copy of your data collected with at least three questions/responses
 - **Online:** print out a section or share a document with me showing your results and the data from at least three questions
- Suggestion (mental note or you can submit): What are some difficulties you have had with collecting this data? Are your responses what you expected? Are there any responses in particular that really stand out or some that were “underwhelming”?
